

CHAMS EDDINE RABIA

PROCESS ENGINEER | PETROCHEMICAL TECHNOLOGY

Annaba, Algeria | +213 (0) 676 309 104 | chamssourabia@gmail.com | [LinkedIn](#) |

Military Service: Exempted | Driving License: Type B

PROFESSIONAL SUMMARY

Process engineer with a Master's degree in petrochemical technology and experience in oilfield cementing at NESR, production monitoring at CGS LaBelle and hydraulic software support. Practical background in field operations, equipment maintenance, hazard identification, coordination with maintenance teams and technical reporting.

CORE TECHNICAL COMPETENCIES

- | | | |
|----------------------------------|---------------------------------------|---|
| • Oilfield & Wellsite Operations | • Cementing Operations Support | • Oil & Gas Surface Equipment |
| • Equipment Checks | • HSE Compliance & Risk Awareness | • Job Planning & Field Execution |
| • Pressure Equipment Awareness | • Technical Reporting & Documentation | • PFD & P&ID Interpretation |
| • Process & Utility Hydraulics | • Hazard Identification | • Troubleshooting & Analytical Thinking |

PROFESSIONAL EXPERIENCE

FIELD SUPERVISOR TRAINEE - CEMENTING

National Energy Services Reunited Corp. (NESR) | Hassi Messaoud, Algeria | Nov 2024 - May 2025

- Assisted with primary and remedial cementing operations, pressure monitoring and field reporting under supervision.
- Supported operation and maintenance of cementing units, mixing systems and bulk plant transfer lines.
- Participated in preparation and verification of cementing fluids according to operational requirements.
- Worked on more than 10 swivels and more than 10 triplex fluid ends; participated in a complete fluid end disassembly.
- Participated in safety briefings, identified hazards and reported unsafe workplace conditions and equipment.
- Collaborated with engineers and field crews during cementing job preparation and execution.
- Supported collection of cementing operational data and preparation of technical reports.

TECHNICAL MANAGER LEVEL 2

Corps Gras Seybous LaBelle (CGS LaBelle) | Annaba, Algeria | Apr 2024 - Nov 2024

- Supervised production operators and coordinated crude vegetable oil reception, transformation and refining operations.
- Monitored production processes, supported process optimization and coordinated with maintenance teams to ensure equipment reliability.
- Applied quality, industrial safety and operational compliance requirements while supporting root-cause analysis and team coordination.

HYDRAULIC SOFTWARE SUPPORT SPECIALIST

ProcessTool Company | Remote | Apr 2023 - Oct 2023

- Provided technical support and training for FlowMax hydraulic liquid calculation software.
- Worked with PFD/P&ID interpretation, process and utility hydraulic layouts, technical documentation and multidisciplinary engineering support.
- Developed training manuals and practical examples and addressed technical customer inquiries.

FREELANCE EXPERIENCE

FREELANCE TRANSCRIPTION & CONTENT EDITING SPECIALIST

Independent Freelancer | Remote | Jun 2025 – Present

- Delivered freelance transcription, proofreading and content/document editing assignments for remote clients.
- Edited and formatted written content for clarity, accuracy, consistency and client requirements.
- Managed revisions, deadlines and confidential client materials independently in a remote work environment.

EDUCATION

MASTER'S DEGREE IN PROCESS ENGINEERING - PETROCHEMICAL TECHNOLOGY

University of Boumerdes, Faculty of Hydrocarbons and Chemistry | 2021 – 2023 |

Final Thesis: Study of the Methanol to Olefins Conversion (MTO) | 18/20 - Distinction

BACHELOR'S DEGREE IN CHEMICAL PROCESS ENGINEERING

University of Boumerdes, Faculty of Hydrocarbons and Chemistry | 2018 - 2021 |

OIL & GAS / INDUSTRIAL TRAINING

- **GP1Z Arzew (Mar 2023):** Propane and butane production, storage, feeding, dehydration, separation, refrigeration and oil & gas safety.
- **Fertial Annaba (Dec 2022):** Ammonia (NH₃) production and fertilizer manufacturing processes.
- **Linde Gas Skikda (Mar 2021):** CO₂ capture, purification and liquefaction; medical-grade oxygen safety requirements.
- **Topping Condensate RA2K Skikda (Mar 2021):** Naphtha, kerosene, LGO and HGO separation; product storage and quality control.
